

Erratum and clarification:

Results GHKL males WUSV Winner Show Lerma March 16, 2023

Dear Ladies and Gentlemen, dear WUSV members,

due to an error in the TSB rating of the dog Xenos v. Nürburgring, the overall placement of this dog changes to the last place in the category Excellent (V).

In the working dog classes, breed judges were not selected at the time of the TSB evaluation by the protection judge. Specifically, the selection of the breed judges was in a public and random draw that took place well after the TSB evaluation.

The formal requirements for the TSB are as follows:

2. Evaluation of instinctual predisposition, self-confidence, and resilience (TSB)

2.1. The overall score of the protection service is awarded in the assessment levels "pronounced," "present," and "not sufficient."

2.2. Pronounced:

Self-confidence, urgent, determined, secure grasping and holding, no adverse reactions to stick pressure, close and attentive holding during the guarding phases.

2.3. Present:

Limitations, e.g., in self-confidence, determination, grip and stick behavior, and the guarding phases.

2.4. Not sufficient:

Lack of self-confidence, severe limitations in resilience, and lack of interest in the helper.

The withdrawal of a sporting decision may be justified when considering compliance with regulations, especially if a decision violates internal or external rules or standards or is formally or otherwise incorrect. Particularly true if the decision jeopardizes the sport's integrity or the club's ethical principles. The decision can be revised to ensure compliance with the rules and standards and to protect the association's reputation.

On behalf of the WUSV Board of Directors

Prof. Dr. Heinrich Meßler
